

I just want to give my support to My XM Satellite Radio.
In the New York area I get terrible reception.
my XM radio is my only outlet .

That said I would love for XM to carry my local stations, which as of now I don't get. (Other than local traffic , which is great)

I now hear the NAB is trying to not only block local stations from XM, but the traffic that I already have.

This would be a terrible thing & would anger me greatly!

I hope my representatives are following this closely
